### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art references, singly or combined, teach or suggest an expanded styrene particle having a functional skin layer wherein the skin layer is formed from a coating composition comprising a vinyl-acetate-based polymer and a functional additive. The Senda patent (US 4,433,029) teaches a functional skin but the core is not an expanded styrene but rather expandable styrene. The Rosen patent (US 4,519,964) teaches particles comprising a core of expanded polystyrene beads, an inner layer of vinyl acetate-based polymer, and a skin layer of polyethylene. The Rosen patent does not teach functional additive. In addition, the skin layer (the outermost layer) is polyethylene instead of vinyl acetate-based polymer. It would not have been obvious to add functional additive to the inner layer instead of the skin layer even if considering adding functional additive to the coating layer(s) obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Drawings*

2. The drawings filed on February 4, 2005 are acceptable subject to correction of the informalities indicated herein. The caption on the figures should be in English. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
